An apple a day...

6 DRAWER PINE

As the nights pull in and there is a chill in the air, the crisp autumn leaves cover the grass in the garden... but so does the fruit from the apple trees! There is nothing worse than letting the apples go to waste just because there is no logical storage solution within the home, so the simple answer is a traditional apple rack from Harrod Horticultural.

Martin Fiddes, Horticulturalist at Harrod Horticultural says "The apple trees in Stephanie's Kitchen Garden Project always produce a glut of fruit. Until I started using the apple rack system they would go bad before they were processed or eaten. Now they last much longer with even enough for the staff to take home to make apple crumble or play apple bobbing with their families at Halloween!"

Pinewood stackable rack systems from £18.95 per tier represent **great value for money** whilst the traditional beech 5 and 10 drawer and the 6 drawer pine designs are an attractive addition to the home from £135!

They all provide **generous capacity** and **allow maximum airflow** around the stored fruits - essential to maintain quality and flavour!

There are plenty of other useful harvesting solutions in the Harrod Horticultural range too including a **fruit picker basket/handle** and the **collection bag**, whereas the range of **fruit presses** and **crusher** provide an exciting opportunity for all gardeners to take up the time-honoured tradition of fruit pressing and juicing.

10 DRAWER BEECH
