 superior products to grow your own

2009 'Grow your own' bible

At Harrod Horticultural, we wanted to share our excitement with you about our variety of **NEW RANGES for 2009**. There are plenty of inspirational, imaginative and practical products to help the keen gardener every step of the way and here's a few of the highlights!

All you need for raised bed gardening

For 2009, Harrod Horticultural will offer **everything you need for raised bed gardening**. Seed and plug plants, soil to fill the beds, the launch of 3 new raised bed designs, made to fit hoops/tubing/net kits as well as irrigation systems. It ensures that Harrod Horticultural offer the complete "one-stop shop raised bed package" for the gardener that aims to grow bigger, stronger and healthier fruit and vegetables nurtured the organic way! In particular, our **3 new and exclusive in house designed raised beds** - the **Allotment, Standard and Superior** - all offer the widest range of sizes and heights and will be available in an **unusual triangle shape** that is perfect for awkward corners or **mini sizes** that are ideal for cut-and-come-again salad at the back door. The sourcing of top-soils and a soil improver means we are also able to provide a soil ordering service to take the hassle and strain away from gardeners. So far as the **ready made crop protection solutions** are concerned we've all the options for raised beds too, all exclusive and manufactured in-house. **Hoops and tubing/build-a-ball kits** can be finished with our fitted insect-mesh covers, there's the **anti carrot fly screen** as well as an unusual ornamental aluminium framed cold frame. For accurate and efficient watering, the **drip raised bed irrigation kit** can be easily arranged around rows for squares of crops for greater convenience.

Don't be Cagey about Crop Protection

We have always been synonymous for our fruit and vegetable cages, which are trusted to guard the fruit in RHS and Garden Organic Gardens. This year we have developed **NEW designs**. Showcased at the RHS Chelsea Flower Show 2008, our **Dome Roof Shaped Fruit Cage** is now available in 2.5m square and 3m square sizes. It's designed to maximize the height of tree growth, to protect crops and presents a genuine opportunity to create an elegant statement in the garden. For those challenged with long narrow vegetable plots then our **Corridor Cage** will be of interest. It works particularly well with our other new product launch, the **Wire Growing System**. Designed with the help of fruit growers at the RHS, it gives keen gardeners a great system to grow and train the most beautiful and decorative forms of fruit using espalier, fan, cordon or cane techniques.

Gardening in tight spaces

If you want delicious varieties of fruit and vegetables close to your back door or are short on space and only have a patio to grow on, our **NEW range of patio gardening** options are the answer. The innovative **EarthBox** is designed to give 100% greater yield using 50% less fertiliser and 40% less water than normal as a result of its maintenance free gradient system. We've introduced our in-house designed and manufactured **2 Tier Aluminium Fruit & Vegetable Growing Frame** too which is a real back saving innovation and makes use of every little bit of spare space. By either placing a grow bag or trough on either or both levels, the result is bumper patio crops without the hassle of soil borne diseases, slugs or other ground crawling pests! Gardening style has also been catered in the range too. A solution for ugly grow bags has been found with our handsome **FSC timber Trough and Frame**. It accommodates 2 grow bags on top of each other, for deeper rooting and improved water retention and the handy frame is perfect for climbing beans and tomatoes. Then there is the Planters with Willow Surrounds. These are available for potato, herb, salad and vegetable growing - now you can grow your own in a 20cm x 40cm space!

The Rot Starts Here!

With composting at the cornerstone of organic gardening, we have introduced a colossal **1000 Litre Compost Bin!** It's excellent £/litre value and allows big heaps to self-insulate and aided by the airflow base that provides essential oxygen, faster composting is possible. We've also added the **Sun-Mar Composter** too. With its patented Autoflow® System it will allow the fast action of a batch tumbler to be combined with the continuous output of a bin, allowing waste to be added every day and the harvest of finished compost anytime.

Phew! And this is just the highlights from the NEW Harrod Horticultural 2009 catalogue that is available from mid December.

To request your copy, just reply to this email or why not get ahead of others and request detail on any of these products mentioned. We'd be delighted to provide more information and images that you might request.
