# Harrod Slot & Lock® - well connected!

Vegetable gardeners have long been crying out for easy to assemble and effective solutions for seasonal crop protection, as well as long lasting climbing vegetable support, which is solved with the Harrod Slot & Lock® connector system - the latest innovative and **EXCLUSIVE** launch from Harrod Horticultural.

**Harrod®**  
**SLOT & LOCK**

Locks rigid with  
stainless steel screws - no  
popping out or spinning.

Build square or  
rectangle shaped cages

Build a variety of plant  
support frames

The **NEW Harrod Slot & Lock® connectors** – researched, designed and developed by the go-ahead company in their Suffolk factory – form one part of an impressive double act which offers reliable, cost effective protection and support to all manner of vegetable patch favourites. When teamed up with **16mm diameter x 1.2mm gauge aluminium tubing**, the hi-tech connectors allow creative gardeners to construct climbing support frames or **crop protection cages** of almost any configuration to ensure birds and other pests don't get a look in when it comes to harvest time.

The benefits of the clever NEW Harrod Slot & Lock® connectors keep stacking up; they feature **stainless steel tightening screws** to alleviate that age-old temporary fruit and vegetable cage problem of framework falling apart or spinning; you'll find the **two, three, four and five-way versions** allow an almost limitless array of cages and support frames

to be created (up to a recommended 1.5m tall) and with a 30-180° angled connector also available, you'll find you can squeeze a frame into any odd-shaped corner of the garden.

The ABS tough plastic Harrod Slot & Lock® connectors with a **mat black finish** blends into the garden vista and if an 'invisible' cage is your thing, then the news that Harrod Horticultural's 16mm diameter aluminium tubing is available in powder coated matt black along with natural aluminium will be well received.

And it's not just connectors and tubing which form the NEW Harrod Slot & Lock® collection, as the cutting edge mail order business have done all the hard work for you in the shape of their **ready-made cage kits, runner bean** and **pea support frames**. With the flexible Harrod Slot & Lock® connector system, you can be sure all your crop protection and climbing support needs are safely covered!
