## WHERE DID YOU HEAR ABOUT US?

### SO THAT WE CAN QUOTE FOR YOUR CAGE, PLEASE ANSWER THE FOLLOWING:

IF YOU REQUIRE ANY ASSISTANCE COMPLETING THIS FORM PLEASE CALL: 0845 218 5301 (8.30 - 17.30 MONDAY TO FRIDAY)

## SPECIFICATION

## MEASUREMENT IN METRES(m) / FEET AND INCHES (FT' IN")

1. CAGE CODE (FROM CATALOGUE)  2. MATERIAL Steel  Aluminium  Timber

3. CRITICAL MEASUREMENT? Does your cage need to be an **exact** size to fit features of your site? For example, does the cage have to fit outside or inside a raised bed or pathway? If yes, please carefully measure the site features and include them on your scale drawing on the following page. Please note that this will incur additional cost if the bars have to be specially cut. Yes  No

4. LENGTH AND WIDTH Please specify the length and width required. Unless you have selected yes to the critical measurement, please note this dimension maybe up to approx 2-2.5% longer due to the size of connectors between the lengths on our metal cages. Please state whether these are internal or external measurements. Length:  Internal  Width:  External

5. SPACING Please specify if equal spacing is required between each upright? Please note, due to material and connectors used this may incur extra costs. Where possible the distance between uprights will be equally spaced (equal bays), however unless specifically requested our standard compents will be used to reduce your cost which could mean not all uprights will be equally spaced, resulting in unequal bays. Yes  No

6. ANGLED SIDES? Does your cage have any non right-angled sides? If yes, please carefully measure and include this information on your scale drawing on the following page including the diagonal measurements. Please note that this will incur additional cost and should be avoided if at all possible. Yes  No

7. ARE FOOTPLATES, SOCKETS OR BRACES REQUIRED? We recommend footplates to ensure uprights stay in position on soft ground or areas exposed to high winds. Sockets (only on steel cages) assist with easy installation and braces are recommended on bigger cages to give extra rigidity on windy sites. Footplates Yes  No  Sockets Yes  No  Braces Yes  No

8. DO YOU REQUIRE THE STANDARD HEIGHT OF 2M? Please specify if not, and detail on a side view on your scale drawing on the following page. Please note that this will incur additional cost if the bars have to be specially cut. Yes  Required Height:  No

9. SLOPING SITE? If your site is sloping significantly, special uprights or a stepped design may be required. Please carefully measure the site features and include a side view on your scale drawing on the following page. Yes  No

10. ADDITIONAL DOORS? As standard you will receive one door, do you need an extra door - either on another side or to give you a double door for easy access? please indicate positions on your drawing. (PLEASE NOTE DOORS ARE ONLY AVAILABLE ON CAGES OF 2M OR MORE HIGH) Yes  Total Doors:  No

11. STANDARD NETTING? As standard, cages will come with anti bird netting - would you like us to quote for a different netting? I.e. rabbit wire, deer protection, butterfly or anti-pigeon (reduces risk of snow damage in winter) netting for example? Is yes, please specify which type. Yes  Type:  No

12. ADDITIONAL INFORMATION? Please provide us with any other details you think may be helpful to us?

PLEASE RETURN THIS FORM TO US BY: FAX: 01502 582456, EMAIL: customerservices@harrod.uk.com or POST: HARROD HORTICULTURAL, PINBUSH ROAD, LOWESTOFT, SUFFOLK, NR337NL

**SCALE DRAWING**

Please draw a one dimensional sketch of your cage as seen from above, and if required from the sides for sloping sites. If exact dimensions are required for any of the measurements then please label them as "Exact". If you have important site features such as rased beds, pathways or plants, then please include them and dimension them on your drawing. Indicate if necessary which side of a feature an upright should be positioned. Measurements can be in metres (m) or feet and inches (ft'in") - please coose and state your own scale. We have included two examples sketched below as a reference - use them to check that you haven't missed important information off your own drawing - only include side views if your site slopes significantly. Please make clear notes on your drawings stating whether they are PLAN or SIDE views.
